

PE fabrics FR

Flame-retardant PE woven fabric rolls are processed into tarpaulins, bags, and covers by cutting and sewing them to size. This provides tailored solutions for various applications, including protection of goods, storage, and transportation, while ensuring enhanced safety against fire hazards.

■ Technical data

Tensile strength	970N / 5cm (ISO 13937-1)
Tear strength	68N / 5cm (ISO 13937-1)
Temperature resistance	-40°C / +80°C

■ Product information

- HDPE tape fabric with LDPE coating on both sides
- Each roll fitted with a cardboard core, inner Ø 76mm
- Outer packaging in PE fabric of the same colour as the fabric, with a neutral COVER sticker, 4 languages and EAN code
- Delivered on Euro pallets, placed crosswise (outer dimensions 120×200cm)
- Pallet height approx. 170cm

■ Customisation

- Available roll widths from 5cm to 4m, delivery time 3-4 months
- Custom colour and/or weight: minimum order by arrangement, delivery time 3-4 months
- Private label / own brand or neutral label possible
- These products can be printed
- Optional: VCI anti-corrosion method actively protects your metal against rust (VpCI)
- Optional: CORONA surface treatment gives printed texts more durable adhesion
